

Summer School

Redesign Hospital Operations for the sustainability of healthcare systems: an international perspective

First Edition

Academic Year 2022-2023

ALTEMS
ALTA SCUOLA DI ECONOMIA
E MANAGEMENT DEI SISTEMI SANITARI

**UNIVERSITÀ
CATTOLICA**
del Sacro Cuore

The Post Graduate School of Health Economics and Management (ALTEMS) at Università Cattolica del Sacro Cuore has been involved in training in the field of healthcare management and economics for years, offering Masters and Executive Courses, useful for acquiring professional skills to act successfully in the complex system of healthcare organizations.

ALTEMS has decided to launch the 1st edition of the Summer School entitled "Redesign Hospital Operations for the sustainability of healthcare systems: an international perspective".

Contents and Purposes

The summer school is hosted by the Post Graduate School of Health Economics and Management (ALTEMS) of Università Cattolica del Sacro Cuore and will benefit from the collaboration with these prestigious institutions, particularly:

- ▲ CERISMAS (Research Center in Healthcare Management) at Università Cattolica del Sacro Cuore
- ▲ Gemelli Teaching Hospital
- ▲ Ghent University, Faculty of Medicine and Health Sciences, CuraMa
- ▲ Ghent University Hospital

The program - thanks to the collaboration of important teaching hospitals, universities and research centres from different European Countries - aims to illustrate logistic, organizational and technological solutions and innovations to improve hospital operations.

Currently healthcare production processes are exposed to two different types of challenges.

First, operations managers are asked to manage more efficiently production assets to face the current problems of access to care due to the delays caused by the recent COVID-19 pandemic.

Secondly, healthcare operations need to be re-

designed to better support value creation in the perspective of patients' care considering some critical trends, particularly: (i) chronic diseases; (ii) aging of the population and (iv) one health approach with the need to integrate healthcare with social care.

In this context technology introduces for sure new scenarios and opportunities; we are talking here about big data and artificial intelligence, telemedicine, virtual hospital and automatization.

This summer school course tries to understand how innovations in patient flow logistics and supply chain can create value contributing, eventually, to make our healthcare systems more sustainable.

The Summer School will take place from 4th to 6th of September 2023, from 9:00 a.m. to 6.00 p.m., at Università Cattolica del Sacro Cuore in the campus of Roma (Largo Francesco Vito 1) Only the first day starts at 11:00 a.m. The participants, attending at least 80% of the hours scheduled in the educational program, will receive a certificate of attendance from the University.

Addresssees/Target

This summer school is beneficial to all those persons who hold strategic responsibility in the management of hospital production processes and that are eager to learn from peers coming from different foreign countries. Some examples might be:

- ▲ Chief Executive Officer
- ▲ Chief Medical Officer
- ▲ Chief Nursing Officer
- ▲ Chief Operations Officer
- ▲ Controller
- ▲ Nurse coordinator
- ▲ Chair of department

Suscriptions

The registration fee, as a refund of the expenses for the educational material and the organization of the entire course, amounts to € 1.000,00 + IVA. This amount also includes the participation to a networking event (social dinner).

The minimum number of participants admitted is 8 while the maximum number is 20.

The students coming from Corso di laurea in Economia (Università Cattolica del Sacro Cuore, Roma), or other training programs promoted by ALTEMS will obtain a 20% reduction on the registration fee.

Healthcare organizations associated to the research Center CERISMAS will benefit to the discounts' system linked to the membership.

Università Cattolica del Sacro Cuore reserves not to start or to revoke the course if the minimum number of subscribers is not achieved.

The deadline for applications is scheduled on 27th of August 2023.

Admissions

The application for admission must be presented following the instructions on the web site SUMMER SCHOOL: Redesign Hospital Operations for the sustainability of healthcare, an international perspective | Alte Scuole ALTEMS (unicatt.it)

If the number of the applications exceeds the places available, the priority will be given following the order of arrival.
